

## Endangered Animals Personal Project

Unfortunately, there are many endangered animals in the world today, such as the Galapagos Penguin, Black Rhino, Great White Shark, Mountain Gorilla, Giant Panda and Bengal Tiger.

Choose an endangered animal of your choice and design an eye-catching poster to explain to people about endangered animals.

Things you might like to include:

- What does your animal look like? (Can you draw a picture?)
- How many of the species are estimated to be left in the world?
- Where do you usually find this species?
- Do we know why this animal is endangered?
- How can we help prevent animals becoming extinct?

### What Is an Endangered Species?

An endangered animal is:

- a species that is threatened with extinction;
- a species with a small habitat;
- a species that has a small population.

An **orangutan** is an example of an endangered animal. It is thought there are only around 7500 left in the world.
